

Form Exploration Activities

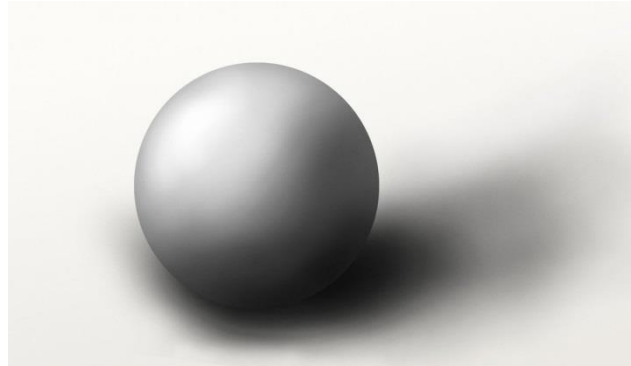

Option 1: Create a few 3D shapes.

Option 2: Create a pencil drawing of an object in the room using value to create form.

Option 3: Try creating a sphere using values to show its form.

Option 4: From a magazine, cut a picture of a 3D object or building. Glue this on your card then trace over the outline with black marker.

Option 5: Try your hand at creating a trompe l'oeil drawing to fool your viewer's eye. Maybe a rip, hole, or crack in your paper. Shading is key!

Option 6: Using collage, create the illusion of form by using simple shapes to make a interior of a cube or room as shown below.
